

# JESSE CORDEIRO

(905) 299-7512 • jesse.cordeiro@utoronto.ca • <https://jessecordeiro.github.io>

## EDUCATION

---

### University of Toronto

*Honours Bachelor of Science in Computer Science*

**Toronto, Ontario**

Expected April 2019

- **Honours:** Recipient of University of Toronto President's Scholarship

## WORK EXPERIENCE

---

### MongoDB

*Software Engineering Intern*

**New York, New York**

May 2018 – August 2018

- Incoming summer intern. Team to be determined

### University of Toronto – Department of Computer Science

*Teaching Assistant – CSC207 (Software Design)*

**Toronto, Ontario**

September 2017 – December 2017

- Led weekly tutorials to reinforce understanding of software design concepts
- Assisted with grading assessments, responded to questions on course discussion board and held office hours to ensure students were grasping the principles of software design
- Course topics include: Java, version control (Git), software engineering principles, design patterns

### Loblaw Digital

*Software Development Engineer Intern*

**Toronto, Ontario**

May 2017 – August 2017

- Integrated OAuth into the authentication flow for the beautyBOUTIQUE.ca e-commerce platform to support the transition towards consuming stateless web services
- Backend engineering on cart checkout API resources – contributed to the overhaul of the web client's cart checkout flow by converting legacy session-based services to stateless web services and exposing them as a RESTful API
- Standardized API documentation for the platform by introducing an internal instance of Swagger
- Technologies used: Java, Python, Spring, JUnit, Mockito, MySQL

### TD Bank

*Software Engineering Intern*

**Toronto, Ontario**

May 2016 – August 2016

- Led the design and implementation of an internal web application to regularly monitor SSL certificates accessed by TD's WebBroker trading platform – alerts teams of expiring certificates
- Developed a utility tool to ease the process of investigating log files in production by enabling the development team to seamlessly associate encrypted account activity with users reporting issues
- Collaborated with WebBroker's backend development team to implement new features and resolve issues affecting the trading platform
- Technologies used: Java, JavaScript, Spring, JUnit, MongoDB

## DEMONSTRATED QUALIFICATIONS & OPEN-SOURCE DEVELOPMENT

---

- Industry experience with: Java, Spring, JavaScript, React, Node.js, Python, Databases (SQL, NoSQL)
- Strong understanding of: algorithms, data structures, software design, object-oriented programming

### Request Factory (Developer Tool) – Cross-Platform Mobile App (Android/iOS)

- REST client written using React Native that supports sending API requests and saving responses
- Designed and coordinated development of application architecture and components
- Established a system to improve product quality through code reviews and issue tracking
